- Raise hand or use the chat box for questions or comments
- Please try not to speak over the presenter or a speaker
- Public meeting – this meeting is being recorded

Distribution Planning Advisory Group Vision

- Provide expertise and support towards informing a transparent, robust, holistic planning process for electric system operations and investment.
- Contribute to and inform the long-term plan to ensure operational efficiency and customer value are maximized.

Distribution Planning Advisory Group Goals

- Inform stakeholders about the electric system
- Provide greater transparency in planning process
- Provide opportunity for feedback
- Open to all stakeholders
- Flexible to adjustments

Weather and System Planning

Justin Sharp, EPRI

Weather Dependent Load Modeling

Erik Lee, Avista

Next steps

- Develop an approach to using the DER potential study results in the upcoming system assessment (2025)
- Create 2025 DPAG work plan
- If you have a topic suggestion, please send it to-
