

## Understanding your net metering bill

Net Billing Meter – Your usage is being offset by what you produced.

Elec Rec = Electricity received by Avista from you.

Elec Del – Elec Rec = Net electricity used by you. If this is a positive number, it means you used more than you generated. It reduces the 'Ending Bank' or, if no bank exists, is billed per regular billing rates. If this is a negative number, the kWhs are banked for future use and reflected in the 'Ending Bank' row.

Elec Del = Electricity Avista delivered to you.

## **Electric Detail**

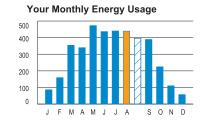

Read Dates: 08/01/19 to 09/03/19 - 33 Days

Meter	Service	Meter Reading		Read Type		Meter	Energy
Number	Туре	Previous	Current	Previous	Current	Mult.	Usage
66000345	Electric	2461.743	2900.851	Actual	Actual	1	439.108

Rate Schedule 063 Production Meter

Production kWh 439.10800

Charges \$0.00

Production meters can be identified by this 'Rate Schedule 063' line. This meter measures only what your system produces (generates).

While the table and graph state 'Energy Usage,' this is actually 'Energy Generated.'

\* Please note: Production meters are not required by Avista and not all customers choose to install one. If one is installed, the generation detail will appear on your statement. Current Period (439 KWH for 33 days of service)

This Period Last Year (396 KWH for 31 days of service)
